1 HILNA™ PRODUCT LINE OVERVIEW

NuWaves' HILNA family of amplifiers is designed to achieve high RF gain while maintaining extremely low noise, and high third-order intercept point across a wide band. HILNA's robust power supply also operates over a very broad range easily allowing the unit to be integrated into systems without regard to power supply precision.

1.1 HILNA™ PRODUCT LINE HIGHLIGHTS

- High Performance - Noise, Gain, Intercept, Dynamic Range: Unique combination of extremely low noise, high gain, high output intercept, and wide band frequency coverage.
- Robust Power Supply: Operates over a very broad range of power supply voltages. Included with each amplifier is a mating power connector with cable attached.
- Enclosures:
 - HILNA HF, HILNA V1, HILNA G2V1, and HILNA GPS are housed in a black or silver anodized extruded aluminum enclosure with mounting flanges.
 - μ HILNA is housed in a miniature sleek black anodized milled aluminum enclosure.
 - HILNA LS is housed in a black anodized milled aluminum enclosure with mounting holes incorporated into the chassis
 - HILNA CX is housed in a nickel plated rugged aluminum enclosure with mounting holes incorporated into the chassis.
- Completely Characterized: The HILNA family of low noise amplifiers has been completely characterized over temperature, voltage, and frequency. The amplifiers are robust, offering significant value for the OEM user or the Systems Integrator.
- User Friendly: Reverse-voltage protection and regulator thermal shutdown provide defenses against user interface issues.
- High Reliability: NuWaves' selection of conservatively rated components provides high reliability delivering high Mean Time Between Failure (MTBF) numbers. Each HILNA is inspected to IPC-A-610 Class III quality standards. NuWaves' Quality Management System is AS9100:2016 Rev D and ISO 9001:2015 certified.
- ESD Protection: The HILNA Amplifiers are suitable for many types of applications where ESD susceptibility is prominent. The amplifiers are designed to withstand up to 1000 V utilizing ESD waveforms described in IEC 61000 4-2.

- **Applications:** IF or RF Buffer Amplifier ▪ Overcome Systematic RF Losses ▪ Increase Antenna Signal Levels ▪ Military Radios ▪ RF Wideband Front-Ends ▪ RF Pre-Amp ▪ TV ▪ Final Stage Amplifier for Low-Level Repeaters ▪ Long Cable Runs to Antenna ▪ Ultra Low Noise Applications ▪ LNA for Cellular Base Station ▪ High Linearity Systems ▪ General Purpose Amplification ▪ High Performance Receivers ▪ High Power Drive Signals for Increased Dynamic Range ▪ High Reliability RF Amplifier Applications ▪ Base Station Applications ▪ VHF/UHF Amplification ▪ Final PA for Low-Power Applications ▪ Low-Noise Transmit Driver ▪ Cable Modem ▪ Fixed Wireless ▪ Mobile Infrastructure ▪ Industrial Scientific Medical Band Applications
- **Users:** Engineering and Scientific Laboratories ▪ Test and Measurement Facilities ▪ OEMs of RF High End Systems ▪ Research Laboratories ▪ Communications Engineering Firms ▪ Cable TV System Engineers ▪ RF System Integrators ▪ Test Ranges ▪ Universities ▪ Antenna Design Facilities ▪ Field Service Technicians ▪ Aerospace and Defense Systems ▪ Radio and TV Engineers ▪ Amateur Radio ▪ Scientific and Consulting Agencies ▪ Radio and Wireless Communication Services ▪ Precision Equipment Repair Organizations ▪ Professional and Technical Service Institutions ▪ Military Radio & Communication Facilities product models

1.2 HILNA™ PRODUCT LINE MODELS

NuWaves offers several variants of the HILNA line-up. The HILNA family of amplifiers operates from 2 MHz to 12 GHz frequency range. Product availability is depicted in Table 1.

Table 1: List of Models

MODEL	DESCRIPTION
HILNA HF	2 MHz to 50 MHz, 30 dB Gain, Available with Automatic Gain Control (AGC)
HILNA V1	50 MHz to 1 GHz, 20 dB Gain
μHILNA	50 MHz to 1500 MHz, 20 dB Gain
HILNA G2V1	50 MHz to 1 GHz, 40 dB Gain
HILNA GPS	1.2 GHz to 1.6 GHz, 32 dB Gain
HILNA LS	1 GHz to 3 GHz, 50 dB Gain
HILNA CX	3 GHz to 12 GHz, 35 dB to 40 dB

2 HILNA™ HF OVERVIEW

NuWaves' HILNA HF is a broadband low noise amplifier designed to achieve high gain while maintaining low noise and a high third-order intercept point in the High Frequency (HF) bands. This high-performance module delivers 30 dB of gain across the frequency range of 2 MHz to 50 MHz with an OIP3 of +30 dBm and P1dB of +18 dBm.

HILNA HF's robust power supply also operates over a very broad range easily allowing the unit to be integrated into systems without regard to power supply precision. This model is also available with automatic gain control (AGC). Consult factory for details.

Figure 1: HILNA HF Functional Diagram

2.1 HILNA HF ELECTRICAL DATA

Table 2: HILNA HF Absolute Maximum Rating

Operating Voltage	+30 VDC
RF P _{in}	+12 dBm
Operating Temperature	-20 to + 60 °C
Storage Temperature	-40 to + 85 °C

Table 3: HILNA HF DC Specifications

	Unit	Min	Typ	Max
Operating Voltage	VDC	+12	+12	+30
Current Consumption	mA		150	300

Table 4: HILNA HF RF Specifications

Parameter	Unit	HILNA HF		
		Min	Typ	Max
Frequency Range	MHz	2		50
Gain	dB		30	
Noise Figure	dB			5
OIP3	dBm		+30	
P1dB	dBm		+18	
VSWR In			1.5:1	
VSWR Out			1.5:1	
Reverse Isolation	dB		53	

3 HILNA HF INTERFACE DEFINITIONS

The HILNA HF operates over a supply voltage range of +12 to +30 VDC and is reverse-voltage protected and current limited.

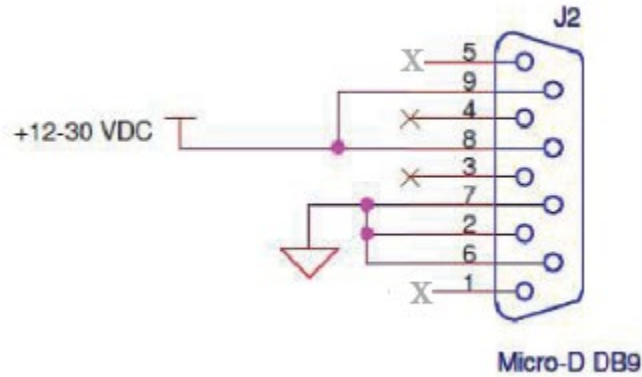

Figure 2: Interface Pinout Diagram

Table 5: PWR/CTRL Pinout Definitions

PWR/CTRL Pin No.	Pin Name	I/O	Description
1, 3, 4, 5	No Connect	N/A	No Connect
2, 6, 7	GND	Input	DC return ground
8, 9	V Supply	Input	DC Supply Voltage, +12 to +30 VDC

4 HILNA HF MECHANICAL SPECIFICATIONS

Figure 3: HILNA HF Mechanical Outline with Mounting Flanges

Table 6: HILNA HF Mechanical Specifications

RF Bulkhead Connector	SMA female
RF Input and Output Mating Connector	SMA male
DC Power Connector	Micro-DB9
Dimensions (L x W x H)	3.15" x 2.50" x 1.18"
Weight	5.00 oz.

5 INSTALLING, CONNECTING, AND USING THE HILNA AMPLIFIER

HILNA amplifiers have been designed to be highly reliable under the specified operating conditions. The following installation and interfacing guidelines should be followed to prevent damage to the RF module.

Caution: The HILNA amplifier contains components that are sensitive to Electro-Static Discharge (ESD). The use of wrist strap, mats, and ground straps should be adhered to during the installation process.

5.1 CABLING

The HILNA HF is equipped with high-performance RF connectors. Gold plated SMA-type receptacles are used because they perform very well across the usable frequency range of the unit. For optimal performance, a high-quality 50 Ω coaxial cable with SMA-type plugs should be used to interface with the amplifier.

Caution: Due to the wideband nature of the unit, installation should not be attempted on a tower with transmit antennas.

If cables with the SMA-type connectors are not available, high quality adaptors are available for most coaxial connector types.

5.2 POWER SUPPLY

The HILNA HF contains internal linear voltage regulators. These regulators protect the circuitry from voltage variations at the input and allow for the wide operating voltage. The power connector for the units is an industry standard Micro-DB9 connector. The only restrictions on the power source for the unit are:

- Capable of sourcing 300 mA of current
- Capable of sourcing +12 VDC to +30 VDC

Car batteries (through a cigarette lighter adaptor), laboratory DC power supplies, or wall transformers are suitable power sources as long as the superimposed ripple is low in amplitude.

5.3 CONNECTIONS

Caution: Do not apply RF to the unit until after all cable connections are made and power has been applied.

Making the connections from the HILNA HF is easily accomplished:

1. Connect the "RF OUT" connector on the unit to a 50 Ω coaxial cable
2. Apply power to the unit by first plugging in the power cable sent with the unit into the DC power input.
3. Connect the power leads as directed in Table 5. Power is now ready to be applied to the unit.
4. Connect the RF Source to the RF Destination with a second 50 Ω coaxial cable.
5. Apply RF to the input cable assembly.

Powering down the unit is done by reversing this procedure.

Connection Summary:

- Connect the RF Output to a good load. The characteristic impedance is 50 Ω .
- Apply DC (+12 VDC to +30 VDC) at the power connector.
- Connect an RF source to the RF Input connector.

Caution: Excess drive levels at the input to the amplifier can permanently damage the unit. Under no circumstance should the RF Input level exceed +20 dBm.

5.4 ENVIRONMENTAL SPECIFICATIONS

The HILNA HF units are rated for operation from -20 to +60 °C. The enclosure is **NOT** watertight so the unit must be kept dry. It is recommended that the unit be installed in a well-ventilated area or mounted to a heat sink if the input voltage exceeds +20 VDC. The unit will run warmer as the input voltage increases.

6 PRODUCT DISPOSAL – END-OF-LIFE

Safety is a guiding principle of NuWaves RF Solutions. We ensure safe production and operation of our products, as well as end-of-life disposal. Improper disposal can adversely affect the environment, wildlife and human health. Please follow these guidelines when disposing of a NuWaves product:

- Do not remove the cover or any hardware
- Do not remove components from the circuit card assembly
- Do not incinerate
- Do not crush or shred
- Do not dispose of as unsorted municipal waste
- Do not export e-waste outside of the original destination country for recycling
- Utilize an e-Steward or ISO14001 certified e-waste recycler
- Consider export controls during recycler selection
- If a NuWaves product is incorporated into a larger system or sub-system, ensure that these guidelines are followed at system end-of-life

7 GETTING HELP - APPLICATIONS ENGINEERING

NuWaves RF Solutions offers technical support for basic configuration help and troubleshooting, Monday through Friday, 8 a.m. to 5 p.m. Eastern Time.
